Education & Research Experience

ETH Zurich, SIPLAB — *Zurich, CH*

Research Intern & PhD Student at the Sensing, Interaction & Perception Lab (SIPLAB) with Prof. Christian Holz — *Oct 2021 - present*

- **Research focus:** (Statistical) Machine Learning for (Bio-)Medical Time Series in Mobile and Predictive Health
  - **Part I :** Identifying drivers of subjective health (e.g., fatigue ratings) from wearable sensor data via interpretable forecasting
    - ↳ I modeled incomplete and messy data with a low signal-to-noise ratio using generalized linear regression based on carefully engineered features
  - **Part II :** Modeling disease and mortality risk from biomedical time series on the UK Biobank (500k participants) using Cox-regression models
    - ↳ I developed novel signal processing and deep learning algorithms (e.g., for heart rate monitoring) to detect risk factors for stroke
  - **Part III:** Enhancing learning algorithms for irregular time series (Neural CDEs and Multi-Time Attention Networks) with a focus on interpretability
    - ↳ I developed a new technique for irregular time series saliency maps that also uncovers the effect of missing data (e.g., for GP & hospital records)
- **Teaching:** Designing lectures, exercises and exam as Head TA (100+ student course); mentored 17 student theses (6 contributed to paper submissions)

University of Oxford, Lincoln College — *Oxford, UK*

M.Sc. in Statistical Science — Final Result: Pass with Merit — *Oct 2020 - Sept 2021*

- **Thesis:** Model Comparison for Option Pricing in Lévy Stochastic Volatility Markets via Simulation of Stochastic Differential Equations (Result: Distinction)

University of Oxford, Saïd Business School — *Oxford, UK*

Graduate Research Assistant with Prof. Mari Sako and Prof. Matthias Qian — *March 2021 - Aug. 2021*

- Built BERT-based embedding and classification models to automate outsourced text annotation: collab. with OpenOcean VC led to a (short-lived) spin-off

University College London (UCL) — *London, UK*

B.Sc. in Statistical Science — Final Result: First Class Honours (79%), Undergraduate Project Prize — *Sept 2017 - July 2020*

- **Thesis:** Applications of Optimal Transport Theory in Machine Learning (e.g., Wasserstein GANs)

Industry Experience

Goldman Sachs — *London, UK*

Summer Associate, Quantitative Strategist: Counterparty Credit Risk — *June 2025 - Aug 2025*

- Utilized Bayesian statistics to develop new probability of default (PD) model for capital calculations: reduced overestimation of PDs by up to 70%
- Integrated external credit rating data: built ETL pipeline, cleaned data, imputed missing values, and quantified data representativeness

Amazon — *Hemel Hempstead, UK*

Intern, Business Analyst: European Transportation Team — *June 2020 - Sept 2020*

- Built fully automated analysis pipeline to tackle regularly low-performing routes responsible for 3 bn packages a year (ETL data pipeline in SQL, root-cause analysis in PowerBI with integrated R scripts, data validation & upload using Python, tailored statistical tests in R, automated communication via VBA)

Auto1 Group — *Berlin, DE*

Intern, Business Analytics — *June 2019 - Sept 2019*

- Developed KPI-dashboards and R Shiny web application to identify underrepresented but lucrative product groups (analysis was picked up by COO)
- Constructed logistic & k-NN regression models to forecast claim rates and severity to adjust country-wide budgets needed for future reimbursements

Skills & Interests

Statistics	(generalized) linear & non-linear models, statistical ML, stochastic processes, simulation methods (MCMC), Bayesian methods
Data Science & ML	**Time Series** [supervised learning, forecasting, regular & irregular], **Tabular** [interpretable modeling, causality, feature engineering], **Text** [NLP, classification, sentiment analysis, Huggingface], **Big Data** [resource efficient processing & modeling, local or in the cloud]
Wearables	**Time Series** [extracting health metrics such as heart rate, physical activity & sleep stages from IMU, PPG, EDA, temperature, ECG,...]
Programming	**Python** [Pandas, Polars, PyTorch, TensorFlow, Keras, NumPy, SciPy, Scikit-learn, etc.], **R** [data.table, MGCV, ggplot2], **SQL**, **VBA**
Languages	**German** [native], **English** [fluent]
Interests	**Football** [central defender, Team Captain & Social Secretary at UCL Football Club, UCL Sports Colours Award], **skiing** [basically compulsory in Switzerland], **water sports** [sailing, windsurfing], **reading** [Weapons of Math Destruction, Algorithms to Live By]

Selected Publications
